

A 4x4 grid with the following values:

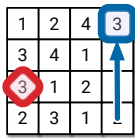

1	2	4	3
3	4	1	2
3	1	2	3
2	3	1	2

Cell (1,1) containing '1' is highlighted with a red diamond. Cell (4,4) containing '2' is highlighted with a blue square.

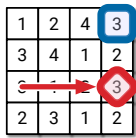

A 4x4 grid with the same values as the first grid. A red arrow points down from cell (1,1) to cell (3,1), which contains '3' and is highlighted with a red diamond. A blue arrow points up from cell (4,4) to cell (2,4), which contains '2' and is highlighted with a blue square.

1	2	4	3
3	4	1	2
3	1	2	3
2	3	1	2

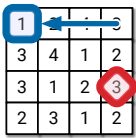

A 4x4 grid with the same values. A red arrow points up from cell (3,1) to cell (1,1), which contains '3' and is highlighted with a red diamond. A blue arrow points down from cell (2,4) to cell (4,4), which contains '2' and is highlighted with a blue square.

1	2	4	3
3	4	1	2
3	1	2	
2	3	1	

A 4x4 grid with the same values. A red arrow points right from cell (3,1) to cell (3,4), which contains '3' and is highlighted with a red diamond. A blue arrow points left from cell (2,4) to cell (2,1), which contains '3' and is highlighted with a blue square.

1	2	4	3
3	4	1	2
3	:	2	
2	3	1	2

A 4x4 grid with the same values. A blue arrow points right from cell (1,1) to cell (1,4), which contains '3' and is highlighted with a blue square. A red arrow points down from cell (3,4) to cell (3,1), which contains '3' and is highlighted with a red diamond.

1	2	4	3
3	4	1	2
3	1	2	
2	3	1	2

A 4x4 grid with the same values. A blue arrow points left from cell (1,4) to cell (1,1), which contains '1' and is highlighted with a blue square. A red arrow points up from cell (3,1) to cell (3,4), which contains '2' and is highlighted with a red diamond.

1	2	4	3
3	4	1	2
3	1	2	
2	3	1
